

KEEPING YOU UPDATED WITH ALL THINGS BEN BURGESS

BEN BURGESS EXPANDS INTO THE EAST MIDLANDS

We are pleased to announce we will be expanding into the East Midlands and will be building a brand new branch in Oakham, Rutland to cover the county and surrounding areas.

Ben Burgess Oakham will be opening next year and this will be our seventh branch.

Ben B Turner, our Director leading the project, said, *"We are grateful to John Deere for the opportunity to expand once again. Plans for the new location have been submitted and we are looking forward to meeting new customers and providing them with the excellent customer service expected from Ben Burgess. Recruiting a specialist team is a priority for us to ensure we provide that level of service in our new area of responsibility."*

Joedy Ibbotson, John Deere's division sales manager, commented, *"Ben Burgess have built their success on an ethos of first class, proactive customer service and support, and are committed to investing in their future growth."*

"In the interim period before the new premises is officially opened, Ben Burgess are well positioned to cover their new area from existing outlets at Ellington and Coates and have the resource and systems to meet customers' increasing demand for advanced, precision ag technology. We are confident that they will continue to provide the highest possible standards of customer service as they grow still further with John Deere."

Please visit www.benburgess.co.uk for continuous updates on the progress of Ben Burgess Oakham.

We are recruiting for several new exciting roles to build our business. Please visit www.benburgess.co.uk/careers for further information on joining the BB team.

BEN BURGESS AWARDED TWO NEW FRANCHISES

We are pleased to announce that we have been appointed as a full Väderstad dealer at our Norwich, Aylsham, Beeston, Newmarket and Ellington branches with immediate effect. Our new branch at Oakham will come on stream in 2021.

Andrew Gamble, Väderstad Marketing Manager, said, *"As a well-established company with an enviable reputation, Ben Burgess is seen as an ideal partner to provide the resources, commitment and professionalism necessary to develop all aspects of the Väderstad brand and products."*

The primary aim whenever there is a commitment to change within the distribution network is to retain the support of the customer base, and to this end Väderstad is confident that Ben Burgess will apply the shared values to the benefit of everyone."

David Fairman, Sales Director at Ben Burgess, said, *"We are pleased to announce our new partnership with Väderstad. Their product line is industry-leading in cultivation, drilling and planting technology and will offer us a full portfolio of cultivation equipment that ties in seamlessly with John Deere's technology and tractor line-up, including the latest range of large models. It is therefore a very exciting opportunity for Ben Burgess and our customers."*

Everyone at Ben Burgess is looking forward to working alongside Väderstad in the challenging but exciting years ahead.

KRAMER
on the safe side

With our expanding John Deere territory comes a new telehandler franchise for our Coates and Ellington branches. Kramer will now be offered by these branches with immediate effect. Once open, Ben Burgess Oakham will also supply the brand's full range of telehandlers and wheel loaders.

Kramer, of which John Deere have a financial share, offer a full product line including four wheel steer compact loaders, a range of heavy duty agricultural telehandlers and small loading shovels. They also offer a completely electrically-driven compact wheel loader, the KL25.5e (pictured), which looks an exciting addition to the range.

Stock and demonstration machines have been ordered and are due to arrive at both Coates and Ellington branches in June.

To view all our brands visit www.benburgess.co.uk

OUR GROUNDS CARE TEAM HELP CHOOSE THE RIGHT MACHINE FOR YOU

Adam recommends...

Brand: **Stihl**

Models: **iMow® 4 & 6 Series**

Price: **from £999**

Perfect for: areas up to 1.2 acres (5000m²) with up to 45% gradients, those looking for a practical time-saving solution to lawn care & for those that enjoy nifty technology with remote control from your phone or tablet.

STIHL®

The iMOW® robotic mower mows and cares for your lawn at the same time: it shreds the grass clippings finely, which fall back onto the lawn acting as an effective fertiliser (known as mulching).

Not only does this provide vital nourishment to help grow a thick and healthy lawn, it also means there are no grass clippings to collect and dispose of.

We provide a free initial consultation to ensure your garden is suitable - contact us today.

BEST SELLER

David recommends...

Brand: **John Deere**

Models: **X350 & X350R**

Price: **from £4,199**

Perfect for: keen gardeners and small businesses requiring mulch, side discharge & rear collector* options. (*X350R model).

This quality-built machine provides exceptional comfort & unique features making it enjoyable and easy to use. 2 year warranty comes as standard with the option to extend to a 4 year warranty if required.

John Deere ride-on mowers start from **£2,019** with 36", 42", 48" & 54" deck options

Steve recommends...

Brand: **John Deere**

Model: **Z540R**

Price: **from £5,929**

Perfect for: people that require unrivalled manoeuvrability to cut around trees, ornaments & other obstacles.

A 48" deck with a high capacity design allows owners to cut larger volumes of grass making mowing the lawn a fast & efficient experience.

JOHN DEERE

John Deere zero-turn mowers start from **£3,399** with 42" & 48" deck options

Current offer:

Buy a STIHL iMOW® and get a **FREE** FSA 45 grass trimmer (RRP £109)

John Deere's sales and marketing team has been on a roadshow around the UK, allowing customers to meet the brand new line up of large tractors, including the much anticipated four track 8RX which was unveiled at Agritechnica late last year.

Our demonstration events were held on 9th & 10th March in Barnham Broom, Norfolk and Ramsey, Cambridgeshire and were attended by more than 180 customers. Working conditions varied at both events and each allowed the 6R, 7R, 8R & 8RX to be put to the test with many jumping in the driver's seat to experience the developments and capabilities of the new models first hand.

Both events highlighted real excitement for the latest machines from the new 13-model line up, John Deere's most comprehensive yet.

Carl Pitelen, Group FarmSight & Optimisation Manager, accompanied many customers in the 8RX over the two days. *"Everyone was amazed by the low noise level and the excellent ride quality,"* he said. *"The manoeuvrability also surprised users, including its ability to turn tightly without scuffing headlands."*

Credit: David Williams, Farmers Guide

Customers considering a purchase were able to see how versatile the tractor was and how it could be used for drilling, cultivations and even spraying too.

Thank you to T Long & Co. & Abbots Ripton Farming for allowing use of their land for our events. And a big thank you to everyone that visited us and the Ben Burgess, John Deere and Kuhn teams for all their help in making the events a success.

SO WHAT'S NEW?

The industry exclusive 8RX Series, hailed as the Soil Specialist, has been developed with the aim of maximising soil protection without compromising performance. It therefore provides by far the lowest contact surface compression in it's class.

The latest 8R Series retain John Deere's existing, well proven and economical 9-litre PowerTech PVS & PSS engines, with an increase of 40hp on the 8RT 410. Established transmission options include the 16/5 PowerShift, the modern e23 with Efficiency Manager and the stepless AutoPowr.

John Deere's latest generation 7R Series tractors include a new flagship model, the 7R 330, which delivers a maximum power rating of 373hp with Intelligent Power Management.

Farmers and particularly contractors looking to maintain low operating costs will benefit from these new tractors' proven fuel efficiency. The 7R has already established its economic efficiency in DLG tests and with many participants in the company's ongoing fuel guarantee programme. Extending this concept to the new top of the range 7R 330 means the advantageous power to weight ratio of only 30kg/hp can have a further positive impact on performance, acceleration and fuel consumption.

Drivers will appreciate the completely new cab design, which features a state of the art seat available with a two-mode massage function and various electric and pneumatic adjustable seat components.

Further detailed cab improvements prompted by customer requests include a wider entry and a lower placed door handle. In addition, the air conditioning system has been relocated under the cab. This has not only provided increased headroom but also reduced the noise level in the cab even further, even though cooling and heating capacity has nearly doubled.

The pioneering AutoTrac automatic steering system, including an optional StarFire 6000 integrated satellite

receiver, has been further optimised, with Wireless Data Transfer to the John Deere Operations Centre provided free of charge for five years when choosing the connectivity package. Field boundaries, guidance lines and set-up data as well as crop planning and documentation can all be managed swiftly and securely using this web-based platform.

A brand new, revolutionary feature is AutoSetup which will make it possible to download all field, machine and implement data required for individual jobs directly to the tractor. This greatly simplifies the process and means the tractor is ready to use much more quickly in the field, while removing the possibility of an incorrect setup. AutoSetup will be available shortly after the first of these new 8R Series tractors arrive in Europe, in 2020.

The tractors can also be remotely monitored by the JDLink telematics system at the customer's request, to ensure maximum uptime. With customer consent additionally provided for Expert Alerts, potential machine damage can be predicted and the likelihood of expensive repairs can be reduced or completely avoided.

For further information or to request a demonstration, please contact your local Ben Burgess sales representative or visit benburgess.co.uk.

INTRODUCING...

BENBURGESS

AFTERMARKET SOLUTIONS

Ben Burgess Aftermarket Solutions encompasses three support functions which together assist you in fixing cost of ownership and provide you with total peace of mind.

OUR PROMISE

OPTIMUM MACHINE PERFORMANCE Connected FarmSight packages offering machine optimisation and operator training.

MAXIMUM MACHINE UPTIME Preventative maintenance and JDLink machine monitoring.

MINIMUM COST IMPACT Packages designed to save you time and money, fixing your cost of ownership.

ONE SOLUTION

MAINTAIN

Preventative maintenance schedules helping you fix your cost of ownership.

PROTECT

PowerGard Protection plans giving you peace of mind.

SUPPORT

Connected support assists with achieving optimum machine performance.

"As a department our main goal is to live up to our founder's ethos that the customer should always come first and that we must do everything we can to help. This is what we strive for every day."

- Jimmy Lockhart, Aftermarket Solutions Director

MAINTAIN

WHY BEN BURGESS?

Let us take care of your machine maintenance with our preventative maintenance plans. Your local depot will contact you when your machine is due for a service to book in a time that suits your work pattern. Our John Deere qualified technicians have up to date tools and knowledge to maintain your machine to the highest standard. We only use genuine parts which come with a six month fitted warranty.

We don't just service your machine, we follow the John Deere Expert Check routine providing a thorough inspection, this 61 point check system ensures no part of your machine is left uncovered. Our technicians will be in touch to discuss any potential repairs, further increasing machine uptime. In addition, signing up to our Aftermarket Solutions programme gives you 15% off parts and 10% off labour!

BECAUSE WE ARE GOOD AT WHAT WE DO!

Ben Burgess encompasses six dealerships strategically located across East Anglia with 75 technicians and 28 apprentices. Together, they offer over 800 years of combined experience working on John Deere machines, keeping them running at optimum performance and supporting up-time. In addition, our parts experts are always available to advise and have access to over £4 million of parts stock across the group!

PROTECT

POWERGARD PROTECTION PLAN

PowerGard agreements protect you against unexpected repair costs. Two fixed rate levels of cover provide increasingly comprehensive coverage to keep your machines running at peak performance with maximum uptime.

Protect yourself and ensure peace of mind with a **PowerGard Protection** agreement. It protects key components that put power to the ground and keep you moving; so the most complex and expensive components of your machine are covered.

PowerGard Protection Plus agreements provide comprehensive coverage of almost all components for total peace of mind.

Overview of covered components under PowerGard

DESCRIPTION	POWERGARD PROTECTION	POWERGARD PROTECTION PLUS
Engine	■	■
Powertrain	■	■
Steering & Brakes	■	■
Frame	■	■
Hydraulic	-	■

Operator Station	-	■

GreenShield Protection

GreenShield protection is designed to protect your investment after your chosen PowerGard period has ended. In some cases, we can offer a 2 yr, 2000 hr extension!

SUPPORT

Our team of FarmSight specialists deliver outstanding support to optimise your machine, saving you money and increasing your output.

All new John Deere machines come with our "INBASE" connected support package, free of charge, which includes set up of John Deere's online tools as well as an optimisation visit from your local FarmSight specialist.

SERVICE	INBASE FOC Yr 1	SELECT £250 yr 2+	PREMIUM £500 yr2+
1 MyJohnDeere Account Set up	■

From year 2 onward you have a choice of two levels of support to continue through the lifetime of your machine. Both packages include an end of year review which provides an opportunity to look at the data collected by your machine and gain insight into your operations, helping you make informed decisions.

BEN BURGESS FARMSIGHT - THE UNIQUE COMBINATION OF... MACHINES, INTELLIGENT TECHNOLOGIES & DEDICATED SERVICES

All new John Deere R Series tractors are connected machines, meaning they have JDLink telematics installed which capture data around operation, utilisation and agronomic information. With the support of Ben Burgess FarmSight, we can provide utilisation reports which we can help you analyse to assist you in reducing the cost of ownership of your machine.

By also utilising Expert Alerts and the machine dashboard we can also help reduce the cost of operation and therefore deliver the ultimate uptime and customer experience.

How can we help?

The use of telematics to monitor a machine's idle time helps reduce the cost of ownership of a customer's fleet by reducing engine hours; saving on depreciation, servicing and fuel costs.

Examples of data reports provided

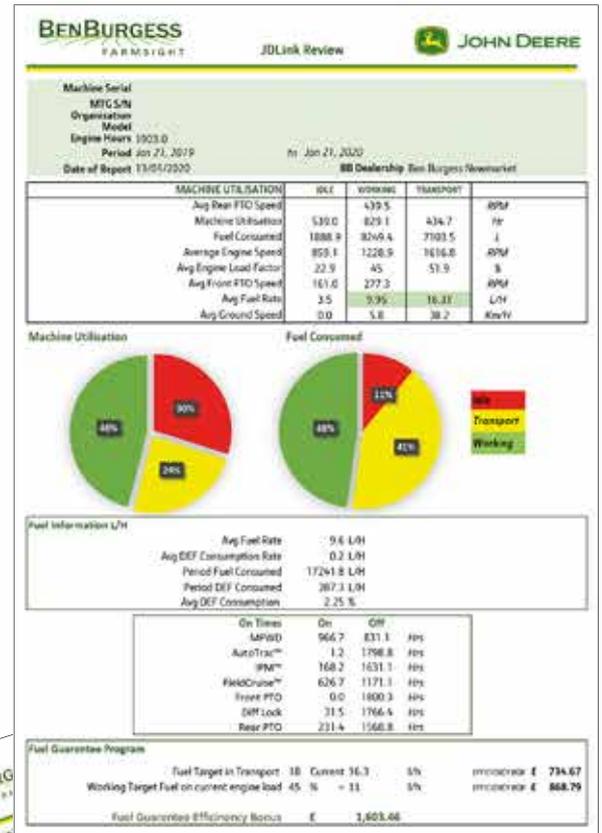

Example of a fleet customer idle time saving

Reducing idle time for a **6145R**
from **32%** (3.28 hrs & 11.58 litres per day)
to **21%** (1.69 hrs & 5.96 litres per day)
saving 1.59 hrs & 5.62 litres per day

Total annual saving: £6,148

(397 hrs, £869 fuel, £1309 extended warranty
& maintenance £3970 in depreciation)

Total saving over 5 years: £30,740

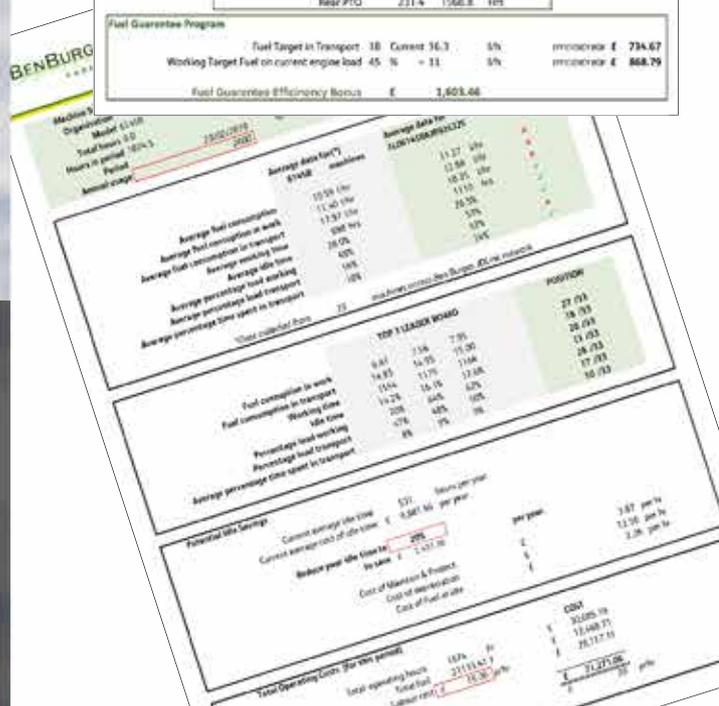

GET THE LATEST GUIDANCE TECHNOLOGY FOR LESS

Farmers and contractors are being offered the chance to upgrade their old John Deere StarFire iTC satellite receivers for the latest SF6000 guidance technology at a specially reduced price, from now up to the end of April 2020.

To find out more please contact your local Ben Burgess FarmSight Specialist.

Find out more about Ben Burgess FarmSight support at:

THE RIGHT TIME TO PREPARE FOR A SUCCESSFUL GROWING SEASON 2020 IS NOW!

Have you thought about how you will increase your yield and lower the costs this year? The development of different diseases in crops is often related to a combination of favourable temperature and leaf wetness period or relative humidity.

With the help of iMETOS Pessl Instruments and our disease model license, you can get an expected disease pressure calculation for more than 85 diseases for over 40 crops including turf grass, wheat, potatoes, onions and apples.

It is estimated that each year farmers lose up to 30% of their yield due to diseases. Reduce this risk with our disease models. Not only that, you will save money, increase your yield, use fewer pesticides and lower their harmful effect on the environment.

carlpitelen@benburgess.co.uk

FUEL GUARANTEE EFFICIENCY BONUS

Guaranteed fuel economy or your money back – this is John Deere's promise for their fuel guarantee campaign.

We were delighted to hand a cheque for **£1,187.80** to **Robert King** of **A J King & Son** recently as an efficiency bonus for beating **John Deere's fuel guarantee** by two litres per hour in the field.

Carl Pitelen, Group FarmSight and Optimisation Manager, presented Robert with the cheque in front of their John Deere 6215R tractor which they purchased new in January 2019. As part of the Ben Burgess FarmSight support package received with all new John Deere connected tractors, Carl was able to help Robert sign up

to the guarantee programme after installing his machine and monitor the machine's fuel usage. Two main reasons for achieving the bonus was by taking care to remove additional ballast when not required and by adjusting tyre pressures to suit the work required.

Get in touch to find out more about John Deere's fuel guarantee programme and how you can receive an efficiency bonus or refund for not meeting the target fuel consumption.

LONG SERVICE AWARDS

In the last three months we have celebrated several long service awards. A big congratulations go to:
Ian Pritty, Robert Turner & Gavin Gray – 40 years service
Carl Pitelen, James Medler & Russell Dagless – 25 years service

Awards are presented at every annual Ben Burgess Christmas Dinner Dance.

Thank you for your commitment and continued loyalty to Ben Burgess.
