

YANMAR

Midi Tracked Excavators - Zero Tail

SV60

The 5.6 tonne SV60-6B is compact, lightweight and has a working envelope of just 3,565mm. Thanks to impressive power and excellent stability, the mini-excavator is perfect for a wide range of applications, including urban renewal, earthmoving, demolition, grading and landscaping

Operating Weight: 5655-5685 kg

Width: 1970 mm

Digging Depth: 3650-3945 mm

ViO80

A true concentrate of technology and innovation, the ViO80-1 is a true zero tail swing midi-excavator which offers the performance of a large excavator while enjoying the benefits of a compact machine.

Upgrading of the powerline components (hydraulic pump, control valve): no compromise between power and compactness.

Operating Weight: 8065 kg

Width: 2270 mm

Digging Depth: 4130-4500 mm

ViO82

The ViO82 is equipped with a standard boom swing. As the boom can swing up to 60 degrees on both sides, the excavator faces the work area when digging a ditch, thus improving the work efficiency and its lifting capacity.

The ViO82 uses the newest version of the Yanmar TNV engines. It is a Yanmar 4-cylinder engine with direct injection and common rail system.

Operating Weight: 8200 kg

Width: 2270 mm

Digging Depth: 4150-4500 mm
