

Wheel Loader

V70S

The V70S is fitted with a powerful engine which delivers results in terms of operation and environmental protection. Fewer emissions, more power. Ensuring a significant reduction in particulate emissions compared with previous levels – from 0.4 to 0.025 g/kWh.

Operating Weight: 5400 kg

Bucket Capacity: 0.70-1.00 m³

Tipping Load Straight: 3950 kg

V80

The V80 Loader has straight and rigid articulation. The wheels forward and backward follow the same way. Providing better reliability and stability.

Thanks to its parallel kinematic system, the V80 takes loads quickly and precisely without having to constantly adapt the load angle.

Operating Weight: 4900 kg

Bucket Capacity: 0.80-1.20 m³

Tipping Load Straight: 3770 kg

V100

The V100 has a very compact dimension in all aspects: height (<2,8m), width, length and turning radius. These compact dimensions contribute to the high maneuverability of Yanmar wheel loaders.

Operating Weight: 5800 kg

Bucket Capacity: 1.00-1.50 m³

Tipping Load Straight: 4370 kg

V120

Designed to excel, the V120 features articulated steering and rear axle oscillation. This allows precise machine operation and ensures a short turning radius – hugely beneficial when changing attachments. Operators benefit from impressive stability, class-leading reliability and unparalleled comfort.

Operating Weight: 7000 kg

Bucket Capacity: 1.2-1.80m³

Tipping Load Straight: 5000 kg

YANMAR

Wheeled Excavators

B75W

Designed with productivity in mind, the B75W sets the standards in power and performance. Thanks to its compact dimensions, unique design and innovative hydraulic system, the excavator is perfect for lifting and carrying heavy loads in situations where space comes at a premium – such as urban jobsites, highway construction projects and landscaping tasks

Operating Weight: 7400-7600 kg

Width: 2190 mm

Digging Depth: 3320-3880mm

B95W

The B95W can be tailored with a wide variety of options and attachments to ensure perfect suitability for exacting applications. From construction and landscaping, to pipelaying and highway maintenance, there's a setup for almost every task.

Operating Weight: 9100-9500 kg

Width: 2460 mm

Digging Depth: 3890-4300 mm

B110W

The B110W is very efficient and can perform tasks reserved for machines with higher weight. Thanks to its enormous lifting capacities and its precise hydraulic system, this 11 tons is capable of transporting and positioning particularly heavy loads on construction sites.

Operating Weight: 11000 kg

Width: 2500 mm

Digging Depth: 4300- 4650 mm
